

Map of Quaternary Faults and Folds of Arizona

Compiled by Philip Pearthree, Arizona Geological Survey
 Digital Representation by Richard L. Dart and Lee-Ann Bradley, U.S. Geological Survey
 Prepared in Cooperation with International Lithospheric Program Project II-2 Major Active Faults of the World,
 Michael N. Machetta, Co-chairmen
 1998

Map Explanation

- normal fault, bar and ball on downthrown side
- fault with lateral slip component
- monocline, arrow points to downwarped side
- fine lines group individual fault sets
- fault section boundaries
- numbers are keyed to fault data report that accompanies map
