Arizona Geological Survey Open-File Report 12-27

October 2012

Curating and documenting this collection was supported by the State of Arizona and the U.S. Geological Survey National Geological and Geophysical Data Preservation Program Grant #G11AP20180.

The views and conclusions contained in this document are those of the authors and should not be interpreted as representing the opinions or policies of the U.S. Government. Mention of trade names or commercial products does not constitute their endorsement by the U.S. Government.

Introduction. In January 2011, the Arizona Department of Mines and Mineral Resources (ADMMR) was closed due to a lack of operating funds. Subsequently, Governor Jan Brewer signed into law a consolidation of ADMMR with the Arizona Geological Survey (AZGS), effective July 1, 2011. As part of this merger, AZGS took custody of all ADMMR files and assets. Governor Brewer's office requested AZGS inventory, catalog, and scan all ADMMR records and files to ensure their preservation and to improve accessibility to them by industry, government, and the public.

At the Governor's request, a one-time appropriation of \$100,000 was approved for AZGS in fiscal year 2012 (FY12) to digitize and preserve the ADMMR files. AZGS received an additional \$41,495 from the USGS National Geological and Geophysical Data Preservation Program for FY12.

Beginning in July 2011, AZGS undertook to inventory and catalog the analog files held by ADMMR, as the first step in what is expected to be a multi-year program to create a digital archive with complete metadata for all materials. Further, we plan to integrate the ADMMR data repository into a statewide system linked to the USGS National Digital Catalog and the USGS-AASG Geoscience Information Network (USGIN).

By August 2012, we completed collections level inventories of all materials in the ADMMR archives: 13,500 folders of mining records from 22 collections; approximately 10,000 maps in the ADMMR map collection; and 7,400 photographs from 6 collections. Collection inventories are available as free AZGS Open-File Reports at the AZGS Document Repository (repository.azgs.az.gov).

AZGS created a record for each item according to the ISO 19115 schema. This includes geographic bounding boxes, descriptions, thematic keywords, spatial keywords, temporal keywords and preservation metadata, which will be compatible with the USGIN catalog and the National Digital Catalog Metadata Profile. Once digitized, files will be accessible for download through the AZGS Document Repository and the USGS National Digital Catalog.

Title

Fred Hohne mining collection

Repository

Arizona Geological Survey

Creator

Hohne, Fred

Date Min

1920

Date Max

1983

Type

Collection

Size

5 linear feet

Description

Fred Hohne spent many years with Wyoming Minerals (subsidiary of Westinghouse) working on uranium exploration projects, especially the Workman Creek area of Gila County. The collection contains geologic reports, drill hole data and maps of the Workman Creek area from the late 1970s as well as many other published reports on exploration in the Southwest U.S.

Subject

Mines and mineral resources--Arizona; Geology, Economic--Arizona; Uranium ores

Acquisition

The files were donated to Arizona Department of Mines and Minerals on January 12, 1998 and open filed to the public January 1, 2000 per the donation agreement. The Arizona Geological Survey received them from ADMMR in 2011 when it took custody of the agency's records.
