
EXPLANATION

- up — Upper-plate rocks
- Detachment fault
- sb — Semi-breccia
- Sub-detachment, common at base of semi-breccia
- nss — Non-, slightly-, and sporadically-mylonitic leucogranites (older rocks deformed)
- Lower-plate detachment
- Other faults
- mg — Mylonitic gneiss
- Structure contours (500 ft. interval) on base of semi-breccia
- Synform or arch in mylonitic lineation and/or foliation
- Ends of cross-section A-A'
- Mylonitic lineation
- Foliation
- Compositional layering
- Dense joint set
- Dike

Scale 1:48,000
